Methodology

The Global Leadership Monitor (first launched in 2021) is a global survey of boards, CEOs, CxOs, and next-generation leaders that tracks key threats to organizational health and leadership preparedness to face these issues.

2,500+ business leaders were surveyed from 12 September to 2 October of 2023.

Participants

Respondents were interviewed across 40+ countries. Given the broader climate and evolving data privacy regulations, China has been excluded from this year's Global Leadership Monitor.

All data has been weighted by sector/industry to create a more representative view of the overall market.

Respondents represent a mixture of publicly traded businesses, private equity or venture-backed businesses, and other privately owned businesses across a range of industries.

Respondents are categorized into the following role-based segments: CEOs, C-suite leaders, next-generation leaders (1-2 levels below the C-suite), and board directors.

This Report

This report includes results among segments with a base size of $n > 30$ for all periods of the Global Leadership Monitor survey. Results with a base of less than 50 (but more than 30) are marked with an * (asterisk) and should be observed with caution.

Data was captured using an online/mobile survey:

- H1 2021 – February/March 2021
- H1 2022 – March 2022
- H2 2022 – October 2022
- H1 2023 – March 2023
- H2 2023 – September 2023

A global survey

Breakdown of participants

Total – All Leaders H2 2023	<i>n=3531</i>
